

DRETTMANN EXPLORER YACHT 24M – ORIGINAL STERN AT THE BOOT 2014

**To have a dream is a great pleasure.
To make a dream come true is a great
challenge, especially if it involves
something as complex as a yacht.**

Claudia and Albert Drettmann tackle this task with dedication and absolute professionalism.

Whether it concerns technical aspects, design, interior or equipment, the highly committed couple attend to every single detail – with a fervour that makes anything possible and leaves nothing to chance. Because quite apart from their technical expertise and creative design skills, it is caring about the well-being of the customer and paying attention to each and every detail that create the special “Drettmann feeling”, the certainty that you will receive the best possible solution from their capable hands.

The story began years ago when their hearts suddenly began to beat faster. In their search for competent business partners, the Drettmann family found exactly what they were looking for in the very first shipyard they commissioned. It was soon clear that the family intuition had not deceived them. With more than 350 yachts sold in record time, their own

15 – 55-metre Elegance and Bandido lines were to become one of the most successful yacht series in the world.

The latest generation of Drettmann Motor and Explorer Yachts is the next chapter in the company’s success story. The new yachts are not merely an upgrade, but have been thoroughly and innovatively redesigned, with features that justify our confidence that they will be yet another worldwide success.

There are many good reasons why Drettmann yachts can be seen in increasing numbers on all the seven seas. The quality of “Made in Germany”, perfect construction and lasting value have earned the latest yacht series top rankings in the yacht market and a central place in the hearts of many owners.

The latest models have been redesigned from scratch, with space and engine performance delivering a standard that is not to be found anywhere else in this class and very rarely even in higher classes. A true quantum leap in terms of design, technology and performance.

Why not come and see for yourself at the Düsseldorf Boat Show from 18 – 26 January 2014?

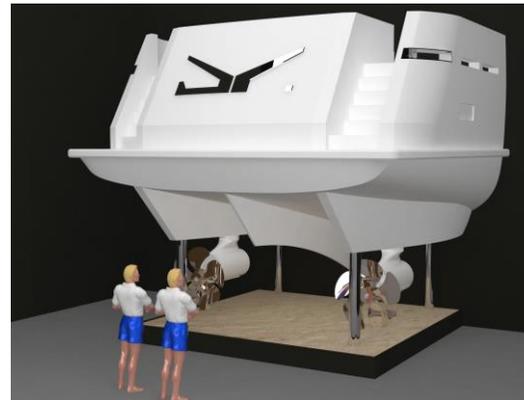

The Drettmann Yachts expert team at Stand 6A07.5 in Hall 6 will be happy to inform you about their products and demonstrate the original stern of one of their 24-m Drettmann Explorer Yachts that is currently under construction.

You are also welcome to visit the Drettmann headquarters on the banks of the Weser in Bremen at any time, where you can also view a permanent exhibition of more than 70 yachts from different providers in the Drettmann Brokerage range. This is the largest exhibition anywhere in Europe and is guarantee to impress and whet your appetite for sailing and the sea.
